ABOUT ME

Aspiring software developer with a passion for developing innovative programs that expedite the efficiency and effectiveness of organizational success. Well-versed in technology and writing code to create systems that are reliable and user-friendly. Looking for an opportunity to apply my understanding of Databases: Sql and MongoDB, Backend: Node JS with Express JS, Frontend: React JS at your company.

PROJECTS

• *MyStore E-commerce*

🌐 <https://mygrocery.ml>

An e-commerce application for grocery store.

- Created backend using Node.JS and Express.JS
- Store data in MongoDB using mongoose.
- Email verification using send OTP.
- Authorization using session.
- User exist check and validation of data using fetch.
- Attractive UI and UX.
- Reusable and organized coding practice.
- Arranging product based on category and subcategory.
- Item search and sorting and filtering based on price, brand, category and name.
- Adding permanent multiple address and user profile management.
- Attractive cart and wishlist with lots of features.
- Admin with user, category and product management.
- Admin can check sales and generate reports with corresponding graphs and export reports into pdf or excel.

SKILLS

Technical Skills

Backend

- Node.JS
- Express.JS

Databases

- MySQL
- MongoDB

Frontend

- HTML
- CSS
- Bootstrap
- React.JS

Others

- Git & Github
- Redux
- AWS
- REST API

Programming Languages

- Javascript
- Java
- C
- PHP

Languages

- English
- Hindi
- Malayalam(Native)

Soft Skills

- Problem Solving
- Leadership
- Creativity
- Adaptability
- Self Learning
- Fast Learning

Other Projects

<https://github.com/sabeern>

- Simple user management system with session and CRUD operation using Node Js, Express Js and MongoDB.
- Clones of popular web sites like youtube, javatpoint tutorials etc... with html, css and bootstrap.
- Created a Todo list application using React Js.
- Personal portfolio website using bootstrap.
- Online book details app using Node Js and Express Js.
- Created a Netflix clone with React Js and TMDB API.
- Prepared an OLX clone in React Js with the help of Firebase.
- A sample admin user management system using Node Js and MongoDB.

Job Solutions(Current Project)

<https://job-portal-gwu4.onrender.com>

- Currently I am doing a MERN stack project for Job solutions.
- Backend created With Node Js and Express Js.
- Front end designed with React Js and React bootstrap.
- MongoDB is used to store the data.
- JWT Tokens are used for authentication of users.
- Redux store is used for global state management.
- Real time chat with socket.io

EDUCATION

- **MERN Stack Intern : Jul 2022 - Current**
Brototype
- **University of Calicut : Jul 2014 - Apr 2016**
Sullamusalam science college, Areacode
Master of computer science
- **University of Calicut : Jun 2011- Mar 2014**
Sullamusalam science college, Areacode
Bachelor of computer science

DECLARATION

I hereby declare that the above mentioned information is accurate to the best of my knowledge and belief.
